MAPLARGE FINDS THE UNKNOWNS WITH ARMADA'S ATTACK SURFACE MANAGEMENT

MapLarge needed continuous visibility beyond point-in-time tests. With Armada's (powered by risk3sixty) Attack Surface Management, MapLarge uncovers hidden exposures, validates true positives, and gets fast, actionable reporting month after month.

WHY MAPLARGE FOUND A TRUSTED ASM PARTNER IN THE ARMADA TEAM (IN MARVELL'S WORDS)

> *"risk3sixty is my backbone for staying ahead of issues."*
>
> *"ASM found things we didn't know existed, including look-alikes and external exposures."*
>
> *"From day one, the demo surfaced a real issue. That proved the value and secured stakeholder buy-in."*

WHAT MADE THE DIFFERENCE

- A live evaluation immediately revealed a vulnerable spot, demonstrating impact before purchase.
- Results arrive as true positives (not noise), reducing time wasted on false alarms.
- Easy-to-consume monthly readouts, proactive emails, and calls for urgent items quickly show what changed, what matters, and what to fix next.

OUTCOME

- ASM identified assets and exposure points beyond two annual pen tests (internal + external).
- Hidden assets, duplicates/look-alikes, and external risks surfaced and addressed before incidents.
- Stakeholders see measurable reduction in unknowns and a tighter remediation loop.

MARVELL SUMMEROW

Senior Security Program Manager

MAPLARGE

Industry: Geospatial / GovTech (public sector, regulated buyers)

Objective: 24/7 discovery of assets/exposures beyond annual pen tests to reduce surprises and false positives

Approach: risk3sixty ASM with continuous discovery, expert validation, and monthly readouts

> *"If you're looking for a consulting firm, every person I've worked with at risk3sixty is amazing. They're personable, they respond, and they make sure you get the right answer."*
