Introducing the **risk3sixty Ecosystem**

Sawyer Miller
VP of Product

risk3sixty was founded 10 years ago because Christian Hyatt and Christian White wanted to build a business aligned to their personal values.

That meant creating something special.

Not special in the sense of it's just "different" but special in the sense that it meant something personal to each individual who encountered it - a worthy mission, if you will.

The last decade has been spent bringing that vision to life. It is now referred to as **The risk3sixty Way**.

The risk3sixty Way is built on a foundation of **operating principles**. These principles guide everything that risk3sixty produces.

There are three layers that build from the inside out.

1. The five **core values** represent our business belief system. They guide our decision making.
2. The core values are manifested through our operational **strategy flywheel**. The flywheel brings the values to life through a strategic logic that gains momentum over time and drives the core values deeper into the DNA of the business.
3. The flywheel is tactically applied through the **Management Operating System (MOS)**. Tactical execution is realized through an adherence to the MOS.

Every decision that has been made over the last decade has strengthened the three-layer relationship of the core values, the strategy flywheel, and the MOS.

This framework has brought to life three distinctly different, but genetically similar, product lines. These product lines work independently and also together as one unit to serve the **CISO** of sub-enterprise and enterprise companies.

Many CISOs are underwater, carrying the weight of security and the liability of a breach on their shoulders. They want to strategically invest in their teams, but the fires keep popping up.

Compliance is an afterthought as a mechanism to secure the company more effectively and now AI is putting budget pressure on them that mandates they do even more, with even less.

Where do they turn?

The risk3sixty ecosystem provides a comprehensive answer to this. **Armada Continuous Threat Exposure Management (CTEM)** works to take all of the downstream security noise and synthesize it into a stable stream of information that is vetted, contextually relevant, and most importantly - **actionable**.

ARMADA
Powered by risk3sixty

As they get their head above water while Armada covers their exposure points, they begin to be able to invest in more strategic compliance that moves the needle for security posture.

ethOS is there to help them navigate the growing complexity of their multi-framework compliance programs.

Advisory from a world-class consulting team helps them realize the reality they've been striving for which is finally being able to manage this sprawling program through a single pane of glass, **fullCircle**.

The mandate to do more with less is realized through agentic AI implementations into fullCircle. The xLM suite of agents helps them to free up valuable time across the team to finally be able to collaborate across security, compliance, and every other business function.

A flywheel of their own begins to spin creating a compounding effect that continuously drives better security posture and cleaner assurance operations.

The ability to offer these CISOs all of this under one roof provides something that no one else on the market can - seamless collaboration and communication across security and compliance.

Their historically siloed organizations begin to open up and provide value across the aisle. Layer that with the assurance and trustworthiness of the The risk3sixty Way and the CISO now has something more valuable than any single vendor can supply.

We become the well they draw success from. And we do it the right way, for them.

Why?

Because it is a worthy mission. It's simply the right thing to do.

What Our **Clients** Are Saying

Leave No Doubt

NPS Score: 10
Feedback: *Communication, quality of work, quality of people.*

NPS Score: 10
Feedback: *Jeremy Sharp was amazing to work with.*

NPS Score: 10
Feedback: *Great group to work with, very knowledgeable and fast to respond.*

NPS Score: 10
Feedback: *Great balance of team that is enjoyable to work with and believing in the quality of work being done.*

NPS Score: 10
Feedback: *Exceptional knowledge, support, and consistent, proactive communication*

NPS Score: 10
Feedback: *Clear communication, quick responses to questions*

NPS Score: 9
Feedback: *Team communication and quality of work.*

NPS Score: 10
Feedback: *Our project was handling well with no disruptions. The platform used is easy to navigate.*

NPS Score: 10
Feedback: *The experience has been very smooth and the team has been super responsive an transparent throughout the process.*

NPS Score: 10
Feedback: *Friendly, professional and knowledgeable team. Efficient use of our time.*

NPS Score: 10
Feedback: *Risk3sixty has been an exceptional partner for our security and compliance journey. Their team guided us through a comprehensive CMMC Gap Assessment, delivering clear, actionable insights that immediately strengthened our security posture. What truly set them apart was the seamless integration of their fullCircleGRC platform into our workflow. It gave us structure, visibility, and a centralized place to manage our compliance efforts that's already paying dividends.*

We're now collaborating with risk3sixty to build a custom security framework that will align with both CMMC and ISO 27001 requirements. Their ability to translate complex standards into a unified, practical roadmap has made this process not only manageable but genuinely strategic for our organization. Expert guidance, responsive support, and a platform that actually makes compliance streamlined is why risk3sixty earns a full 10/10 from us.

NPS Score: 10
Feedback: *Excellent communication, high-quality work, and well-structured audit approach. Their evidence request portal is user-friendly, and their regular touchpoints ensure transparency and alignment. They are proactive in following up on open items and helping us work through gaps while maintaining a collaborative and professional tone. Their organization, responsiveness, and clarity make the audit process smooth and effective, and I would highly recommend risk3sixty.*

NPS Score: 10
Feedback: *Our delivery team was excellent throughout the entire process. They did a great job of leveraging existing evidence from prior internal / external audits, which reduced the workload on our team. They were extremely well-prepared for the interviews - they knew our environment well going into the conversations and asked great questions.*

Additionally, which potential gaps came up, they consulted with our team to ensure that we had a strong understanding of the risk and they helped us ensure that our remediation would adequately address the gaps. Our team was extremely satisfied with the audit as a whole, and a number of stakeholders proactively reached out to ensure risk3sixty would be performing our PCI DSS assessment again next year.

Craftsmanship Highlights

Master Tradesmen Who Producing Uncommon Quality

Airia and risk3sixty Announce Strategic Partnership

We're excited to announce a strategic partnership with Airia to help organizations modernize how governance, risk, and compliance work gets done.

By combining Airia's enterprise AI platform with risk3sixty's deep GRC expertise, we're creating a smarter, more practical path to automating complex compliance and risk workflows.

Together, we're focused on high-impact areas like evidence management, vendor reviews, risk management, and policy operations, helping teams spend less time on repetitive work and more time on strategic priorities.

For our clients, this means access to enterprise-grade AI automation paired with a team that understands how to implement it in the real world.

Georgia Tech Honors the Founders Behind risk3sixty

risk3sixty co-founders Christian Hyatt and Christian White were recently featured in Georgia Tech Scheller College of Business's Entrepreneurs series. A fitting recognition, given that Scheller is precisely where the risk3sixty story begins.

The two met as Executive MBA classmates on the first day of the program. Their shared vision, aligned values, and a drive to build something meaningful turned that first-day introduction into a decade-long partnership and a nationally recognized firm.

The feature is a meaningful milestone, not just for Christian and Christian, but for every person who has contributed to building what risk3sixty has become.

Team Highlights

Continuity in Purpose and Action

Q1 Annual Kickoff: Clarity, Momentum, and Recognition

The risk3sixty team gathered for our annual kickoff and offsite, a moment to step back from the day-to-day and align on where we are headed as a firm. The agenda was anchored around two themes defining this next chapter: Our expanding focus on agentic AI for GRC and the enduring commitment to serving both clients and our team with excellence.

A standout moment of the event was a brand reveal from Sawyer Miller, VP of Product, who introduced ethOS, the new brand identity for risk3sixty's Advisory and Assurance practice. The name reflects exactly what it sounds like: The principles and integrity that have always been our north star, now given a distinct identity.

Leadership shared updates on the business, the market, and the opportunities ahead, while reinforcing the values that continue to shape how we show up for clients and for each other.

The event also included dedicated time to recognize team members whose hard work, dedication, and impact have been instrumental to our momentum. This is a reminder that the firm's progress is, at its core, a people story.

The evening closed with a happy hour at Topgolf, a fitting end to a day built around connection, clarity, and looking ahead together.

risk3sixty Takes the Stage At WiCyS 2026

risk3sixty was proud to serve as a sponsor of the Women in Cybersecurity (WiCyS) 2026 National Conference in Washington, DC. Our presence was not passive but purposeful this year. As part of the sponsorship, we distributed over 2,000 copies of Christian Hyatt's celebrated children's book, *CISO the Dog Saves Secure City*, and led an engaging session.

Presented and facilitated by three risk3sixty team members, Lindsey Nicholas, Grace Pfohl, and Audrey Johnson, risk3sixty led a hands-on workshop that drew more than 200 participants. In partnership with Airia, the session challenged security professionals to rethink how they operate, leveraging agentic AI to automate high-volume, repetitive tasks and reclaim capacity for work that demands human judgment.

Conferences are built in the hallways as much as the session rooms. The event gave the ladies an opportunity to engage meaningfully with peers across the industry, building relationships that extend well beyond a single event. And yes, Washington, DC's culinary scene made for an excellent backdrop.

We extend our sincere gratitude to the WiCyS organizers for the opportunity to sponsor, present, and contribute to a community that is actively shaping the future of cybersecurity.

Security Leaders Get Practicial on Agentic AI

Since its launch in 2025, risk3sixty's CEO & Co-Founder, Christian Hyatt, has hosted Security Leader Networking Day quaterly at our Atlanta office. It is a forum built for direct dialogue, not keynote theater. The November session tackled the topic commanding every security leader's attention right now: Agentic AI.

The day was designed for leaders who know AI is important, but have not yet seen what real implementation can look like. This session was designed for leaders who recognize AI's urgency but haven't yet seen what real, practical implementation looks like inside a security or GRC program.

Through a live presentation and facilitated discussion, attendees worked through the hard parts: Common security and GRC pain points, the pitfalls that derail early AI efforts, and a clear four-step framework for moving from problem identification to execution. No theory or vendor pitches..

Armada Joins the Cybersecurity Community at DistrictCon 2026

Our Armada Proactive Services team was proud to take part in the inaugural DistrictCon 2026 as a Silver Sponsor, joining security practitioners from across the community for a weekend of connection, learning, and hands-on engagement in Washington, D.C.

Led by Director of Proactive Security, Cory Wolff, the team spent time in the Village of Villages connecting with attendees, talking through real-world offensive security and attack surface management challenges, and hosting a Capture the Flag experience at our table.

As a first-year event, DistrictCon created an exciting new space for red teamers, blue teamers, and security leaders to come together, and we were excited to be part of it from the start.

What Team Culture Look Like in Practice

Culture isn't built in a single grand gesture. It accumulates in the quiet decisions to pitch in, to be present, and to invest in one another beyond what the job requires. This quarter, our team gave us several clear examples of exactly that.

WiCyS Prep
Teammates rallied to help prepare more than 2,000 books for the WiCyS National Conference. No ask too big, no task too small.

Engineering Week
Our engineering team carved out intentional time during the quarterly week to align on strategy and shape the direction of what comes next.

Atlanta Half Marathon
Two Strange Renegades laced up together and crossed the finish line at the Publix Atlanta Half Marathon, side by side

Different moments, different settings but the same signature. When something matters to risk3sixty, our people don't wait to be asked. Everyone steps in, support each other, and deliver together. That's not a coincidence. **That's who we are.**

Promotions

We are excited to announce the promotion of the individuals below. This achievement reflects these individuals' consistent dedication, exceptional performance, and embodiment of our core values. Beyond their technical expertise, these individuals have also demonstrated outstanding leadership qualities and consistently going above and beyond to drive our mission forward.

Please join us in celebrating their well-deserved promotion!

Congratulations - here's to the continued success and innovation you bring to the team.

What It Actually Takes to Run a GRC Program (And Why Most People Get It Wrong)

Running a GRC program is an operational role. It takes business acumen. It takes influence and collaboration with stakeholders across the business. It's ongoing. It's messy. And it doesn't care whether you just passed an audit six weeks ago.

Why GRC Teams Spend More Time Managing Tools Than Managing Risk

For teams already overwhelmed by evidence requests and audit cycles, purchasing a GRC platform felt like the responsible move. And yet, years later, many of those same leaders will quietly admit the outcome didn't match the intent. Instead of gaining leverage, they found themselves spending more time managing the tool than managing risk.

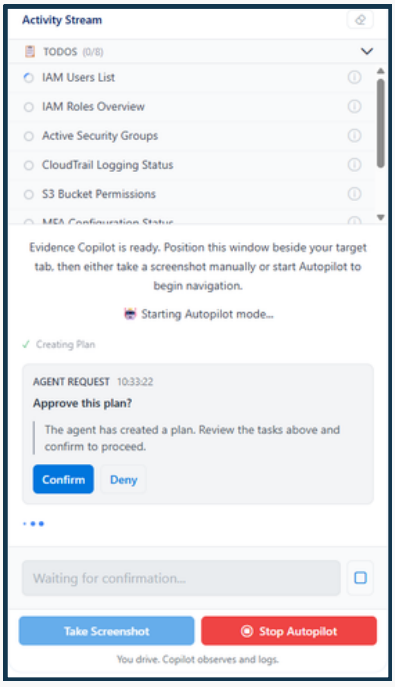
3 New fullCircle Updates: **Less Manual Work, More Visibility & Increased Accuracy**

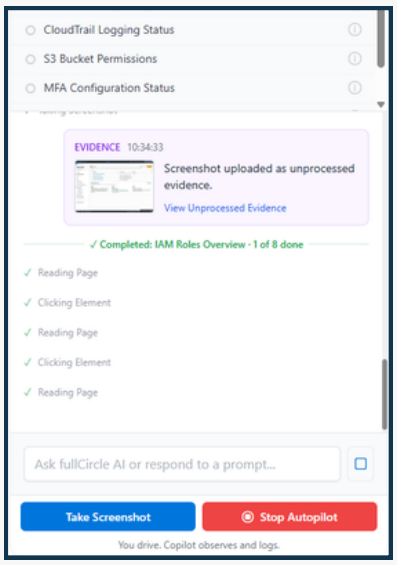
Evidence Collection, Without the Manual Work

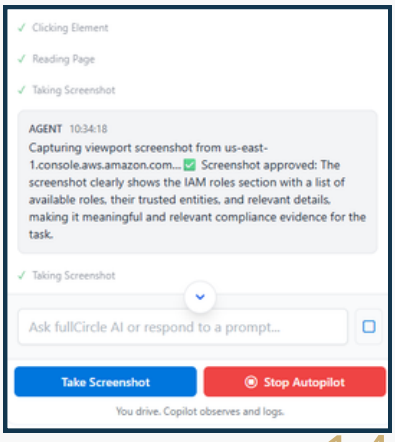
The new Evidence Collector brings AI-assisted evidence collection directly into your browser. Instead of taking screenshots, saving files locally, and uploading them later, teams can capture and route audit-ready evidence in real time as they work.

A guided side panel ensures every screenshot is properly named, timestamped, and linked to the right control or assessment instantly. For repeatable workflows, Autopilot can navigate systems and collect evidence automatically, turning a multi-step process into a consistent, repeatable flow.

Result: Less manual effort, cleaner evidence, and fewer gaps during audits.





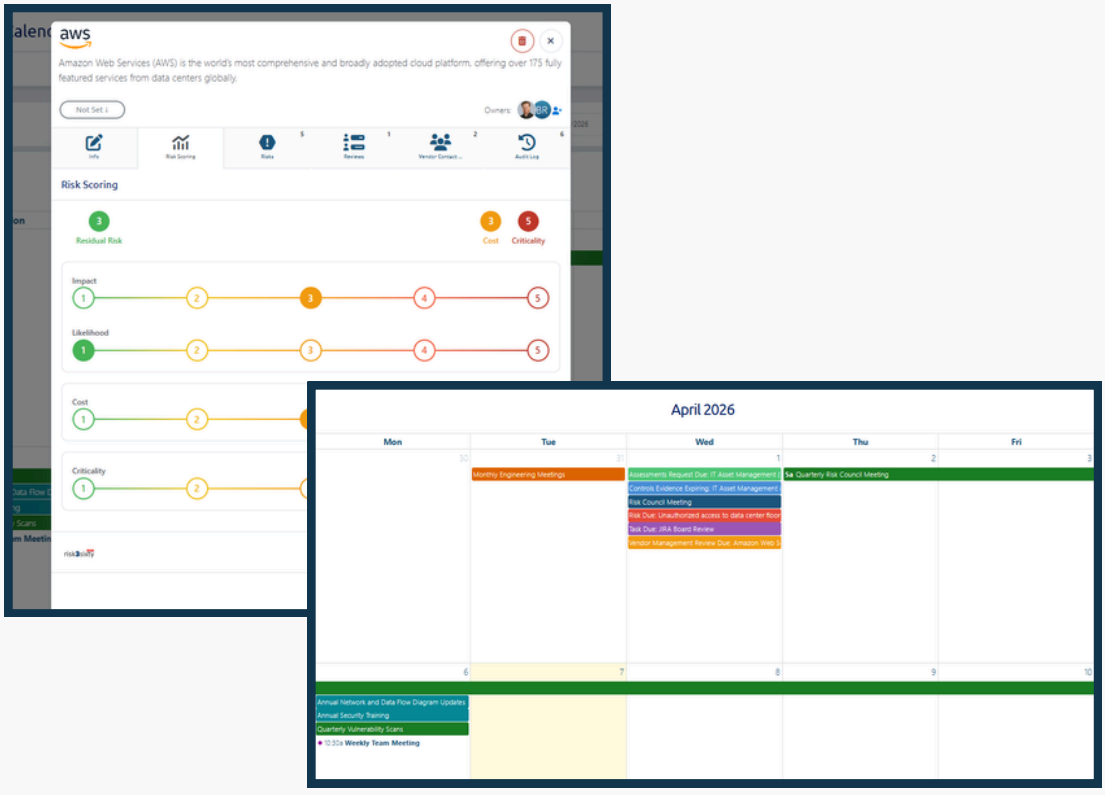


One Calendar for Your Entire Compliance Program

The Compliance Calendar now brings together due dates and review cycles from across the platform into a single, unified view.

Track assessments, control reviews, risks, vendor reviews, and tasks all in one place, with color-coded events by module and filters to focus on what matters most. Users can click directly into records without leaving the calendar, making it easier to stay on top of work and take action quickly.

Result: Clear visibility into what's due, what's at risk, and what needs attention, without jumping between modules.



Faster, Smarter Vendor Management at Scale

Vendor management workflows have been upgraded to reduce manual effort and improve flexibility. Teams can now perform bulk updates across vendors using multi-select, making it easy to update statuses, owners, and review dates in seconds.

Vendor questionnaires also support conditional branching, allowing questions to adapt dynamically based on responses and capture more relevant information.

Result: Less time managing vendors manually and more accurate, context-driven risk assessments.
